# PortStore5

# Serial RS-232 port to Ethernet with logging

PortStore5 connects a full RS-232 or RS-485 serial port to a LAN. Features a 4 MB internal memory for capturing data received over RS-232.

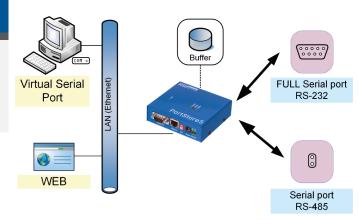

Stored data can be retrieved when the LAN connection is re-established. Remote serial port can be accessed in Windows as a Virtual Serial Port

With PortStore5, you will never lose remote RS-232 data. Recommended for replacing serial printers.

The Box-2-Box mode can "tunnel" the serial port over the LAN between two devices. All 9 pins of the serial port are supported.

PortStore5 can also transfer the 9<sup>th</sup> bit (extended parity or "9-bit" transfer mode).

## **Applications**

Backing up a RS-232 printer output:

- Security system status
- Barcode scanners
- · Scales (weighing systems)
- Weather stations

- Serial port logger memory
- ✓ Full RS-232 serial port
- ✓ Box-2-Box mode
- ✓ WEB interface
- ✓ Virtual Serial Port for Windows

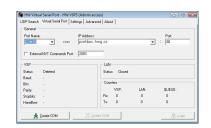

#### **Basic features**

- 4MB serial port logger memory
- Full RS-232 serial port (9 wires)
- Web-based configuration
- Virtual serial port for Windows, free of charge (e.g. COM17 redirected from the PC over the LAN)
- HW VSP multiport supports the full serial port and up to 100 remote serial ports
- HW VSP can be used as a "NT service" in Windows. Ideal for server applications
- HWg-SDK for programmers (contains examples of using the product in Borland C++ Builder, MS Visual C, VB, Delphi, C#, PHP, JAVA)
- Box-2-Box mode: Extend a full serial over the network with two PortStore5 units

#### PortStore5

Ethernet		100 Mbit/s
IP protocols		ARP, UDP/IP, TCP/IP (HTTP, Felnet + RFC2217, RepBuf
RS-232	(RxD, TxD, CTS, R	Cannon DB9M TS, DSR, DTR, RI, CD,GND)
RS-485		Terminals
Serial port logger memory		y 4MB
Power		8-30V / 0.25 A
Dimensions		105 x 105 x 25 [mm]
Operatin	g conditions	-10°C to +75°C +14°F to +167°F
